

VOLUNTEERS NEEDED!

We are looking for volunteers to offer their time, passion, energy, and skills to enrich the lives of our Club Members. Whether in a large group setting or in individual interactions, consistent and positive relationships with adult role models are vital in the development of children and teenagers. **Together, we can make a meaningful and lasting impact on our kids.**

VOLUNTEER OPPORTUNITIES INCLUDE:

- Art
- Mentoring
- STEM Mentoring
- Cultural Activities
- Outdoor Education
- Vocational Programs
- Tech/Robotics
- Maker Spaces
- Gardening
- Cooking/Baking
- AND SO MUCH MORE!

Mentoring & STEM Mentoring

Positive relationships with adults are vital to the development of children and teenagers. Mentors are typically paired with 1-3 mentees to meet with for an hour each week. This quality time together can take many forms: helping with homework, playing games, completing activities, exploring interests & hobbies, or even just eating dinner together.

We are also starting a specific **STEM Mentoring program** for volunteers who have experience or interest in science, technology, engineering, and/or math. Mentors will lead their mentees through a pre-designed curriculum, forming strong connections while facilitating all of the STEM-based activities throughout the program.

Cultural Enrichment

Cultural education and preservation are absolutely crucial to ensure that tribal languages, knowledge, and traditions survive for generations to come. Volunteers can be stewards for the next generation by sharing their time and knowledge with our Club Members through activities like beading, language, drumming and singing, food preservation, dancing, and story telling.

Art & Maker Spaces

Art encourages creativity and imaginative thinking while also giving kids a way to express themselves in a healthy, constructive manner. Volunteers can share their art and talent with our Club Members, nurturing their creativity and their spirit.

In our art rooms, maker spaces, kitchens, and vocational learning center, we have the capacity to facilitate any number of artistic endeavors, including:

- **Painting**
- **Pottery**
- **Beading**
- **Sewing/Quilting**
- **Music**
- **Crafting**
- **3D Printing**
- **Wood Engraving**
- **Dancing**
- **Photography**
- **Drawing**
- **Cooking/Baking**

Outdoor Education

We live in one of the most beautiful places on the planet, and getting our members outdoors to explore and learn about nature is hugely important. Whether it's fishing, camping, hiking, conservation, biological observation, or wildlife safety, we work to make sure that the Club experience extends beyond our doors.

We are also expanding our gardening program, with garden boxes at all three Clubs and greenhouses at our Ronan and Polson Clubs. Members plant, care for, and cultivate a variety of fruits and vegetables, as well as pollinator-friendly flowers. Volunteers with green thumbs would be able to help our kids blossom as gardeners and as people.

Technology & Vocational Skills

Learning practical skills through hands-on experience sets our Club Members up for real-world success. In our vocational learning center, members can learn skills in carpentry and woodturning, metal-work and fabrication, and small engine repair and car maintenance. We need capable volunteers to share their expertise and knowledge with our youth and teen members.

We also want to prepare our members with technological skills, from coding and web design, to music production and filmmaking. Volunteers with experience in and love for technology can teach the next generation of techies with our industry-standard equipment.
